

Unitaid Executive Board Meeting
27th Session
7-8 June 2017
London I & II meeting room
Starling Hotel
Geneva, Switzerland

Resolution n°5

Area for Intervention: Optimizing management of coinfections and comorbidities in people living with HIV

Having considered the analysis presented by the Secretariat during EB27, the Executive Board supports the need for Unitaid to focus strategically on "Optimizing management of coinfections and comorbidities in people living with HIV", specifically in supporting improved access to health products for people with advanced disease, people coinfecting with HPV/HIV and people coinfecting with hepatitis/HIV, with a view to reducing HIV-related mortality and thereby contributing to the global response.

The Executive Board requests the Secretariat to launch appropriate calls for proposals within this Area for Intervention and to present progress on implementation to the PSC.

The Executive Board's endorsement of this Area for Intervention has no budgetary implications.

Celso Amorim
Chair of the Unitaid Executive Board
